

EDUCATION

PHD

LIRMM-CNRS (Engineer Contract)

ROBOTIC CONTROL

Dec 2018 - Nov 2022 | Montpellier, FR

ENGINEER

Polytech Montpellier

ELECTRONICS, ROBOTICS AND INDUSTRIAL

COMPUTER SCIENCE

Sep 2015 - Jul 2018 | Montpellier, FR

Avignon Univ.

HIGHER SCHOOL

PREPARATORY CLASSES

IN MATHS

Sep 2013 - Jun 2015 | Avignon, FR

SKILLS

COMPETENCIES

Robotics

Linux

Electronic Design

Mechatronic Design

3D printing / CNC milling

SOFTWARE

- ROS 2
- OpenCV • IP Networks
- C/C++ • Python
- TensorFlow : CNN, LSTM, YOLO
- Docker • Latex
- VR
- Shell • Git (*Basic*)
- ARM Assembly (*Basic*)
- Mujoco, Isaac

LANGUAGES

French • Mother tongue

English • Fluent

Japanese • JLPT N1

Italian • Intermediate

Japanese Sign

Language • Beginner

AWARDS

Euroskills : Mobile

Robotics (*Bronze*)

Worldskills France : Mobile

Robotics (*Silver*)

Driving Licence

HOBBIES

Volley-ball • Cycling

Running • Hiking

Traveling • Board Games

Accro-Yoga

EXPERIENCES

PRJ ASSISTANT PROFESSOR | KEIO UNIV, PR MINAMIZAWA LAB

January 2026 - Now | Tokyo

- Robotic and Vision research team leader, Haptic Teleoperation

INDUSTRY RESEARCHER | HONDA RESEARCH INSTITUTE

April 2025 - Dec 2025 | Wako, Saitama

- Frontier robotics team on Avatar Project. Embodied Bimanual control

RESEARCH ASSOCIATE | WASEDA UNIV. PR. IWATA' S LAB

April 2023 to April 2025 | Tokyo, Japan

- Embodied 3rd Person view with AR glass for bouldering
- Haptic teleoperation, Control and Learning from Demonstration AI development for Echocardiography medical robot
- Air pressure based Haptic Feedback device development for wearable robot
- Miruoto Project : AI for player recognition during sport live events and Deaf related issues for Tokyo Deaflympics 2025

LECTURER | POLYTECH MONTPELLIER

Sept 2022 - March 2023 | Montpellier, France

- 270 hours of Robotics, Electronics, Automatics and Computer Sciences.

PHD | SKILL TRANSFER WITHIN EMBODIED ROBOT TELEOPERATION (JST ERATO

"JIZAI BODY PROJECT")- LIRMM/CNRS

Dec 2018 - November 2022 | Montpellier, France

- Admittance control of 7DoF Robot arm
- Tele-operation with 3DoF Haptic feedback
- Human arm impedance estimation during Human-Robot Interaction
- Human intention prediction with Deep Learning algorithms from human movements and visual data and guidance through Haptic Feedback

META-LIMB - ERATO PROJECT (JST) | INVITED RESEARCHER

Feb • May • Nov 2019 | Inami-Hiyama Living Lab, University of Tokyo, Tokyo

- Development of a force control for wearable robot arm.

MOBILE ROBOTIC CONTEST (EUROSKILLS) | PERSONAL

Oct 2016 - Oct 2018 | Montpellier, France

- Mechanical robot development, sensors integration, Holonomous control

PROTOTYPING A SUBMARINE ROBOT | ENGINEERING INTERN

May 2018 - Jul 2018 | LIRMM, Montpellier

- Prototyping from product specification a variable configuration submarine based on the principles of umbrella' s stretchers

TOKYO UNIVERSITY OF AGRICULTURE AND TECH | INTERN

June 2017 - Aug 2017 | GV-Lab, TUAT, Tokyo

- Actuators, electronics, underfoot force sensors to lower-limb exoskeleton

PUBLICATIONS

- "Body Sublimation: Designing State-Changing Extended Hand for Embodied Out-of-Reach Interaction" - under review UIST 2026
- "Hybrid Roller-Jamming Grasping: Active Intake with Post-Capture Stiffening" - under review IEEE Access
- "Miruoto : Sports event atmosphere visual rendering through real-time image and sound processing system" - Siggraph 2024, E-tech section
